The Alison Inquiry should not only be the compensation catalyst for those injured or for the families who have lost loved ones due to the covid bioweapon injection; but it also should be the start of arrests and convictions for this obvious genocidal crime against humanity.

The official word from the Canadian government reflects this reality; "No Comment". If they admit wrongdoing, compensation and arrests should follow. The governments official response;

> *“Vaccines are both safe and effective and they save lives... We have no comment on the Allison Inquiry”*

This statement is a continuation of the genocidal campaign. Not only is this stance a crime for those affected by these deadly vaccines and those who refused to comply but it is also a continued crime for those who are still duped by the false statement "safe and effective" and lining up for more. If the truth were acknowledged by the government the vaccination programs would cease, instead the genocide continues, spilling more blood on their hands.

Safe and effective theses bioweapon injections are not, millions of people know the truth, some the hard way. This latest statement from the government of Canada is another obvious lie just like the long list of ridiculous lies regarding the Covid scam and killer injections; Just like the rest, it makes no logical sense + covers up and furthers genocide by killer injection.

Arrest and hang them all!

Canada's Liberal government has "no comment" on the testimony of Canadians injured by COVID-19 "vaccines", not a defense, not an explanation, not even a question answered, just a spokesperson repeating a talking point:

> *“Vaccines are both safe and effective and they save lives… We have no comment on the Allison Inquiry”*

That was their entire answer, to four days of sworn testimony from Canadians whose lives were turned upside down, and honestly, it says everything about where their loyalties lie.

Think about what that means, Canadians, many of them suffering every single day, stood up and told their stories in a public inquiry, and the government’s response, delivered in the name of Health Minister Marjorie Michel herself, was **to call it misinformation and refuse to comment.**

Do they think these Canadians are simply going to “shut up” and go away?

No, the walls are crumbling, the spell is broken, and Canadians injured by COVID-19 “vaccines” are no longer willing to suffer in silence.

And for once, mainstream media noticed, Global National actually aired a report on the Allison Inquiry, a largely unbiased segment highlighting the testimonies of ordinary Canadians, and of course, the government took the predictable route: brush it off, protect the pharmaceutical industry, and label anything inconvenient as “misinformation,” the Ministry of Health even tried to make it political, urging Parliamentarians to “combat misinformation,” as if care and compassion for injured people were a partisan issue, it isn’t.

The mask has slipped, when a government will not even acknowledge the people it injured, when “no comment” is the official policy toward the suffering, it has chosen the pharmaceutical industry over its own citizens, that is the story the mainstream press finally put on national television, and Canadians saw it.

Now is the time to act, contact your MP and tell them the vaccine-injured must be heard, acknowledged, and properly compensated, contact Health Minister Marjorie Michel and do not let her government ignore these Canadians any longer, and keep speaking, keep sharing, because every conversation breaks the silence a little more.

The inquiry is public, the testimony is on the record, and all four days can be watched [below - or] at **covidtestimony.com**, the government can say “no comment,” but the Canadians who lived it are talking, and now the country is listening, the walls are crumbling, **keep pushing.**
